Periodontal Probing
 Use blue or black ink
 Circle all probe reading
 $\geq 5\text{mm}$ in red ink

Bleeding
 Place red dot above probing # to indicate bleeding upon probing

MGJ
 Measure & place blue dot on the horizontal line on the root of the following teeth: Facial #3, 6, 8, 9, 11, 14, Facial and lingual #19, 21, 22, 24, 25, 27, 28, 30. Draw a line connecting the dots.

Recession
Imm = 1 line
 Mark red line on buccal or lingual root apical to CEJ, write # on crown of tooth.

Furcations
 Chart on root surface at location of the furcation

- △ Class I
- △ Class II
- ▲ Class III
- ◆ Class IV

Mobility
Chart in box

- I < 1mm
- II > 1mm
- III > 1mm & depress

TISSUE DESCRIPTION

Gingival Description: Circle each gingival characteristic & note generalized (ex. GEN.) or localized (ex. Loc.), tooth # (ex.#5), location (ex. facial, lingual mesial or distal), distribution (ex. diffuse, marginal, papillary)

Date:				
Color	Consistency	Contour/Shape	Surface Texture	Gingival Position
Pink	Firm	Margins Knife-edged	Stippling	Recession
Dark Pink	Spongy	Rolloed Papillia	Shiny	Pseudo pocket MAG
Red	Fibrotic	Pointed	Smooth	Bleeding & Exudate
Cyanotic		Bulbous		BOP
Pigmented		Blunted Cratered Clefted		Exudate
Dental Hygiene Diagnosis:
