Patient's chief complaint _____
Oral Health Education _____
Last NSPT _____
Pain _____
Appearance _____

Periodontal Reevaluation

A reevaluation of periodontal conditions will be conducted on all appointments after NSPT has begun. You will re-probe the previously treated quadrant(s) before beginning the next quadrant(s)

Chart all probe readings over 5mm or if there is a change of greater than 2mm

Chart all BOP

New tissue description if tissue conditions have change
